REST / JSON API Endpoints

These endpoints provide structured JSON payloads for building custom client interfaces, channel search filters, and media dashboards.

Endpoint Target	URL	Primary Keys / Output
Channels Metadata	https://iptv-org.github.io/api/channels.json	id, name, country, categories, website
Active Stream Links	https://iptv-org.github.io/api/streams.json	channel (foreign key to id), url, http_referrer

Channel Logos	https://iptv-org.github.io/api/logos.json	channel, url (high-res SVG/PNG)
Categories Index	https://iptv-org.github.io/api/categories.json	id, name
Countries Index	https://iptv-org.github.io/api/countries.json	code, name, languages, flag
EPG Guides Directory	https://iptv-org.github.io/api/guides.json	channel, site, site_id, lang

EPG (XMLTV) Program Guide URLs

Direct .xml.gz links to feed electronic program schedules and "what's playing" metadata into your UI.

Open-Source GitHub Repositories

Channel Catalogs & Database

- **iptv-org/iptv**: Master playlist repository with 10,000+ legal free-to-air channels.
- **iptv-org/api**: Automated scripts generating the static JSON API endpoints.
- **iptv-org/database**: Centralized data store of channel identities, broadcast formats, and broadcast ownership.
- **Free-TV/IPTV**: Verified independent legal public stream directory.

EPG Tools & Scrapers

- **iptv-org/epg**: Multi-source scraper generating global XMLTV data for thousands of channels.
- **BuddyChewChew/multi-epg-light**: Lightweight EPG processor that filters large XMLTV files down to only the channels in your playlist.
- **acidjesuz/EPGTalk**: TV schedule feeds for national and over-the-air US/UK/CA channels.

Players, Web UIs & Stream Proxies

- **4gray/iptvnator**: Cross-platform IPTV player desktop client and PWA built with Angular and Electron.
- **housamz/iptv**: React and TypeScript frontend built specifically to consume iptv-org/api JSON endpoints.
- **Threadfin/Threadfin**: M3U and XMLTV proxy server for Plex, Emby, and Jellyfin live TV tuners.
- **tv-logo/tv-logos**: High-resolution transparent PNG and SVG channel branding assets.
